

STAINLESS STEEL ROLLING RACK FOR CHEESE MATURING ON WOOD

FOR WHAT USE?

Allows a variety of cheeses to be matured on spruce planks in a hanger or cellar. This natural wood is unplanned and untreated, making it ideal for aging cheeses (regulates humidity).

Photo for information only

TECHNICAL DETAILS

Ref and Designation	Height	Dimensions (mm)			Weight (Kg)	Total weight (kg) with 20 boards
		Thickness	Length	Width		
AVCIR Rolling stainless steel frame	176	-	91	76	21	50
AVPE Spruce board	-	17	1000	150	1.44	

- Equipped with 4 swivel castors, 2 of which have brakes, for moving cheese from the cellar to the packaging area, and adapted to doorways.

Note: This equipment can be custom-made to suit your requirements (number of levels, doorways, total height, etc.).
